

CLOUD 13 EVENT – “Becoming a practitioner researcher on improving learning: a reflexive dialogue”

Wednesday October 6th, 2021, 15.00 – 17.00 CEST – ONLINE

The EAPRIL CLOUD 13 of starting researchers organises an online event which delves deeper into the dilemmas that practitioner-researcher can encounter during the process of doing research. The road towards becoming a professional practitioner researcher can be a bumpy one and starting practitioner researchers in organisations have to develop the craft of doing good practitioner research while doing. Sharing experiences and developing joint strategies is a very effective way to support starting practitioner researchers in their endeavours.

Dr. Anje Ros, Professor of Applied Sciences in Learning & Innovation at Fontys University of Applied Sciences in the Netherlands will deliver a short keynote introducing the theme of the role of the teacher researcher in education. Invited starting practitioner-researchers will provoke dialogue by sharing their experiences. You are welcome to join this professional dialogue about critical, bumpy moments and dilemma's that are part of the process of becoming a practitioner researcher on improving learning.

As participants you will gain insight into your own dilemmas and possible solutions. Moreover, you will meet fellow starting practitioner-researchers in this EAPRIL Cloud community. The session will be hosted by the coordinators of EAPRIL Cloud 13: Pieter Seuneke, Ellen Rohaan, Jeroen Bottema and Anne-Marie van der Horst and facilitated by the EAPRIL Office.

HOW TO REGISTER

Are you interested in joining the online cloud 13 event? Please register [here](#). **Deadline is Thursday September 30th, 2021 midnight CEST.** The event is free of charge.

More information on the technical details will be sent around to everyone who is registered for the event a few days before the event.
